

PUMPS

DYNAMIC PUMPS
Kinetic energy

VOLUMETRIC PUMPS
Defined Volume

CENTRIFUGAL
(high flow /
medium head)

**AXIAL & MIXED
FLOW**
(high flow, low head)

RECIPROCATING
(high pressure,
low flow)

ROTARY
(viscous fluids,
constant flow)

The pumped fluid determines material selection and surface treatments, according to viscosity, chemical composition and operating conditions.

- WATER
- CLEAN FLUIDS
- LOW-VISCOSITY FLUIDS

- OIL & FUEL
- VISCOUS FLUIDS
- CORROSIVE OR ABRASIVE LIQUIDS
- FLUIDS WITH SOLIDS
